Piper Seneca V: The Gold Standard of Twin-Engine Performance

This 1997 Piper Seneca V represents a premier opportunity to own a meticulously maintained aircraft that balances timeless style with significant recent mechanical investment. The aircraft is truly mission-ready, boasting **two turbocharged engines that were completely overhauled in July 2024**, providing the safety and reliability of a reset clock. This power is paired with **brand-new propellers installed in July 2023**, ensuring peak aerodynamic efficiency and smooth operation for years to come. On the ramp, the original paint scheme in White with Beige, Red, and Blue stripes remains in excellent condition, reflecting a history of exceptional care.

Inside, the cabin is designed for the high-end traveler, featuring a classic Bright Beige interior in a spacious club-seating configuration. Passengers can travel in total comfort regardless of the outside temperature thanks to the rare luxury of factory **Air Conditioning**, while the integrated entertainment center and individual reading lights ensure every journey is as relaxing as it is productive.

For the pilot, this aircraft is a highly capable all-weather platform, **fully FIKI certified** and with supplemental oxygen. The flight deck is a masterclass in modern avionics, headlined by the **Garmin GTN 750** and supported by a King KFC 150 Autopilot with GPSS Roll Steering, offering a turnkey solution for those who refuse to compromise on safety or luxury.
